

ENGINEERED RESIN SOLUTIONS AND **WILLIAM A. SCHMIDT ANNOUNCES** **STRATEGIC EXCLUSIVE PARTNERSHIP WITH** **CONSOLIDATED PIPE & SUPPLY**

Chester, Pennsylvania, September 20, 2013 – ERS/Schmidt has announced a strategic, exclusive partnership with Consolidated Pipe & Supply (CPS), Birmingham Alabama for ERS/Schmidt to represent its extensive product line in the North Eastern United States.

In our continued effort to better serve our customer base, ERS and Schmidt realize the value of our "one stop shop" philosophy as it pertains to heat exchanger fabrications, repairs and controlled coating applications. ERS, in partnership with its coating manufacturer, ErgonArmor (www.ergonarmor.com) have developed **ERS- 3302 Novolac pipe and tank coating**. This cutting edge pipe lining system is by far the most advanced epoxy lining available when it comes to the protection of pipe line internals and the adhesion characteristics are exceptional. The ERS-3302 is flexible enough to handle pipe line installation mechanical stress yet strong enough to handle a wide range of temperature variations as well as eliminating corrosion from salt water and Hydrocarbons.

As with our exchanger program, ERS and Schmidt have combined the ERS-3302 pipe and tank coating with a world class Pipe fabrication and Coating applications facility, Consolidated Pipe & Supply. Under the direction of ERS inspectors, all hydro-testing, X-ray testing, surface preparation, weld preparation, etc., are strictly monitored to ensure a first class job is achieved.

About Engineered Resin Solutions/William A. Schmidt

Engineered Resin Solutions is the #1 marketer and provider of specialty coating solutions in the Northeastern US, specializing in the refinery, chemical and power generation markets

www.resinteam.com

William A. Schmidt and Sons is 60+ year old fabrication/machine shop that specializes in the power generation, refinery, chemical and chocolate markets in the Northeastern US.
